Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Status of the Claims***

Claim 1 has been presented for examination.

***Specification***

The disclosure is objected to because of the following informalities: The continuing data at page 1 is not consistent with the current status of the application.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 recites treating viral hemorrhagic fever with protein C zymogen. At page 6 of the disclosure it is clearly admitted that the instant invention is directed to treatment of viral hemorrhagic fever with activated protein C, not with its zymogen. There is not even a prophetic example showing how to administer the zymogen in an effective therapy. All the suggested quantities and means of administration disclosed are directed to administration of APC not the zymogen. As discussed in Bang et al. (US 5,151,268), at column 2, the zymogen is activated *in vivo* only very slowly because the activation requires the action of thrombin. It is stated that

Art Unit: 1651

when the zymogen is infused into a patient it will remain inactive until thrombin is generated and complexed with thrombomodulin. Accordingly, the claim is not enabled by the specification disclosure.

No claim is allowed.
